

Aerospace and Orthopedic Precision CNC Machining

CNC Aerospace Machining "Machining Quality Aerospace Products"

With over a century of combined cnc machining experience, Mt. Ida Machining, Inc. has taken the Aerospace Machining Industry to new levels of expertise and accuracy… striving to be the best each year in customer service, on-time deliveries, technical expertise and safety to our employees. In a business where precision and quality is everything, having a clear focus is vital. Mt. Ida Machining's focus is obvious; customer service and quality cnc machining expertise.

If you click through our site, our commitment to attain perfection in all areas is clear. From tolerances achieved to excellent customer realations, it is obvious that we take accuracy & deadlines serious…no matter how complex the job. Much of our expertise is in, but not limited to work with Stainless Steel, Titanium, Plastic, and Wood.

We are in the CNC Aerospace Machining business for the long haul and want every partnership with our clients to reflect that. That means constant investing in state of the art new machinery, learning new management and shop-floor techniques, upgrading certifications and consistently updating our website to keep our customers and potential customers fully informed of changes & our increasing capabilities.

We look forward to speaking with you about your precision cnc machining needs. If precision, experience, mahcining quality and friendliness are of the utmost importance, then look now further than Mt. Ida Machining, Inc.

Thank you for your consideration,

Sincerely,

The Mt. Ida Machining Team
